

# Ripple Effect *Low Impact Development Conference Registration*

Applied Ecological Service (AES) kicks things off with their "Introduction to Low Impact Design," setting the groundwork for our conference. Building on this theme, presentations will focus on LID practices. From *smart growth techniques* to *green roofs*, we'll cover it. We'll have vendors with the latest in LID materials, a field trip to working sites built using LID techniques, findings from the charrette, and an after hours mixer.

Personalize your conference experience by selecting which option sessions you wish to attend. (Space is limited, so we cannot guarantee your preferences. Choices will be honored in the order they are received.) Complete the form and send it in or submit it online. Professional development hours are available. Call Tiffany Frey at (417) 836-6183 or email [tfrey@missouristate.edu](mailto:tfrey@missouristate.edu) if you have questions about this conference. **Registration Deadline is April 25, 2008.**
